Undergraduate study. The Undergraduate Advisor is the resource for specific information such as detailed programs of study tab for details about the various programs.

All the programs introduce central ideas in a variety of areas in Mathematics, Mathematics Education, and Statistics and develop problem-solving ability by teaching students to combine critical thinking with rigorous reasoning. The Mathematics program provides students with a spectrum of courses in pure and applied mathematics, statistics and develops rigorous mathematical thinking.

The Bachelor of Science degrees in Mathematics are extremely versatile degrees. Graduates with these degrees have found their mathematical and analytical training in demand in business, industry, government, and in the teaching profession. The versatility afforded by a degree in mathematics allows graduates to easily adjust to unexpected shifts in employment opportunities and move from one of these areas to another and find numerous employment opportunities. Logical and critical thinking can be used in many different jobs. All our programs provide a strong foundation for graduate study.
