CHEM 100 - Introductory Chemistry 4 Credits
An introductory lecture and laboratory course in modern chemistry for non-science majors intended to make chemistry understandable, accessible and applicable. Topics include atomic theory, stoichiometry, bonding, molecular shapes, acid-base theory, polymers, medicine, and nutrition. Meets Gen Ed - Natural Science Laboratory. 3 hours lecture, 2 hours lab.

CHEM 105 - Basic Chemistry 3 Credits
Prerequisite(s): Restricted to students of the Health Careers Program. This course will introduce the basic concepts of chemistry. 3 hours lecture.

CHEM 106 - Principles of Chemistry 3 Credits
Prerequisite(s): Score of 14 or less on the Chemistry Readiness Test; and satisfactory score on the Mathematics Readiness Test or a grade of C or better in MATH 100. Students with a score of 11, 12, 13 or 14 on the Chemistry Readiness Test can take MATH 100 as a co-requisite. A one-semester introductory lecture in the application of algebra and numerical methods in general chemistry. This course is recommended for students who have no or a weak background in chemistry and are required to complete general chemistry coursework for their major. All students who do not get a satisfactory score on department's General Chemistry Readiness Test must complete this course before they can enroll in General Chemistry I (CHEM 120). This course does not meet any General Education requirements. 3 hours lecture.

CHEM 113 - Fundamentals of Chemistry 4 Credits
A one semester introductory lecture and laboratory course in the fundamental concepts of chemistry. This course is suitable for students who have no prior background in chemistry. It is intended for students majoring in Food and Nutrition and other non-science majors. Some aspects of the course are quantitative, and a background in algebra is assumed. This course prepares students to proceed to CHEM 130 Fundamentals of Organic Chemistry. Meets Gen Ed - Natural Science Laboratory. 3 hours lecture, 2 hours lab.

CHEM 114 - Fundamentals of Chemistry for Nursing 3 Credits
Prerequisite(s): Nursing majors only. A one semester introductory lecture course in the fundamental concepts of chemistry. This course is restricted to students who are Nursing majors. Some aspects of the course are quantitative, and a background in algebra is assumed. 3 hours lecture.

CHEM 120 - General Chemistry I 4 Credits
Prerequisite(s): Satisfactory score on the Mathematics readiness test OR a grade of C or better in MATH 100 or MATH 111 or MATH 112 or MATH 116 or MATH 122 or MATH 221 or MATH 222 OR concurrent enrollment in MATH 100. Satisfactory score on the Chemistry readiness test OR a grade of C or better in CHEM 105 or CHEM 106. Introductory lecture and laboratory course for science majors, prerequisite for all advanced chemistry courses. Introduction to atomic and molecular structure, bonding, stoichiometry, states of matter, solutions, and selected topics in descriptive inorganic chemistry. Laboratory stresses techniques and data treatment and their use in examining chemical systems. Meets Gen Ed - Natural Science Laboratory. 3 hours lecture, 3 hours lab.

CHEM 121 - General Chemistry II 4 Credits
Prerequisite(s): CHEM 120 with a grade of C or higher. Introductory lecture and laboratory course for science majors, prerequisite for all advanced chemistry courses. Introduction to thermochemistry, kinetics; general acid base, precipitation, redox equilibria, electrochemistry and selected topics in descriptive inorganic chemistry. Laboratory stresses techniques and data treatment and their use in examining chemical systems. 3 hours lecture, 3 hours lab.

CHEM 130 - Fundamentals of Organic Chemistry 4 Credits
Prerequisite(s): CHEM 113 with a grade of C or higher. Survey of organic chemistry covering all major classes, nomenclature, and characteristic class reactions. 3 hours lecture, 2 hours lab.

CHEM 190 - Freshman Seminar in Chemistry 1 Credit
An experience for freshmen majoring in chemistry and biochemistry that will help them to succeed in their major by learning study skills and becoming acquainted with the culture of higher education. Meets Gen Ed - New Student Seminar. 1 hour seminar.

CHEM 195 - Problem Solving-General Chemistry 1 Credit
Course designed to help students in application of mathematics in chemistry with emphasis on individual needs. 1 hour lecture. 3 hours lecture, 2 hours lab.

CHEM 199 - Laboratory Project 1-3 Credits
Prerequisite(s): CHEM 120 or equivalent and permission of department. Independent laboratory work in chemistry under the guidance of a faculty mentor. 2 hours lab.

CHEM 220 - Descriptive Inorganic Chemistry 3 Credits
Prerequisite(s): CHEM 121 with a grade of C or higher. Introduction to the descriptive inorganic chemistry of the chemical elements and selected compounds excluding hydrocarbons and their derivatives. The periodic table and periodic relationships among the elements will be used as an organizing tool to explore the sources, properties, compounds, reactions, and industrial uses of the chemical elements. The primary emphasis will be on the main group elements, but transition metal chemistry will also be described. Selected applications of inorganic substances in biochemistry, environmental chemistry, industrial chemistry, material science, and medicine will be discussed. 3 hours lecture.

CHEM 230 - Organic Chemistry I 3 Credits
Prerequisite(s): CHEM 121 with a grade of C or higher. Structure and bonding in organic compounds: nomenclature, reactions, properties, and aromatic compounds; stereochemistry; structure analysis by IR, NMR, UV, and MS; introduction to molecular orbital theory. 3 hours lecture.

CHEM 231 - Organic Chemistry II 3 Credits
Prerequisite(s): CHEM 230 with a grade of C or higher. Nomenclature, reactions, properties, and synthesis of ethers, epoxides, alcohols, amines, and carbonyl compounds; carbohydrates; amino acids, peptides and proteins; pericyclic reactions; synthetic polymers. 3 hours lecture.

CHEM 232 - Experimental Organic Chemistry I 2 Credits
Prerequisite(s): CHEM 230 is a prerequisite or corequisite. A laboratory course to be taken concurrently with CHEM 230. Basic techniques for the separation, analysis and synthesis of organic compounds: recrystallization, distillation, extraction, GC, HPLC, TLC, GC/MS, IR, H/C13-NMR, chemical safety methods and regulations. 4 hours lab.

</thead>
<tbody>
<tr>
<td>CHEM 233</td>
<td>Experimental Organic Chemistry II</td>
<td>2</td>
<td>CHEM 231 and CHEM 232 with a grade of C- or higher. CHEM 232 may be taken concurrently with CHEM 231 and completion of CHEM 232. Basic techniques for organic synthesis, mechanistic studies, separation and analysis, and chemical safety; multistep syntheses, spectral data-base searching, phase-transfer catalysis, anhydrous procedures, analysis of unknowns by wet-chemical and spectral methods. 4 hours lab.</td>
</tr>
<tr>
<td>CHEM 270</td>
<td>Fundamentals of Biochemistry</td>
<td>5</td>
<td>CHEM 130 with a grade of C- or higher. Structure and function of the biomolecules and the metabolic interrelationships in the cell. Primarily for foods and nutrition majors. 4 hours lecture, 3 hours lab.</td>
</tr>
<tr>
<td>CHEM 310</td>
<td>Analytical Chemistry</td>
<td>5</td>
<td>CHEM 230 with a grade of C- or better OR concurrent enrollment in CHEM 230 or concurrent enrollment in CHEM 220. Introduction to concepts of classical analytical chemistry including evaluation of data and apparatus, theory and application of volumetric and gravimetric methods and redox equilibrium, and introduction to electrical methods. 3 hours lecture, 4 hours lab.</td>
</tr>
<tr>
<td>CHEM 311</td>
<td>Instrumental Analysis</td>
<td>4</td>
<td>CHEM 310 with a grade of C- or higher and CHEM 340 with a grade of C- or higher. Introduction to application of instrumental methods of analytical chemistry. Instrument techniques studied will include spectrophotometry, electroanalytical chemistry, chromatography, nuclear magnetic resonance and mass spectrometry. Theory and application will be examined in lecture and laboratory. 2 hours lecture, 6 hours lab.</td>
</tr>
<tr>
<td>CHEM 320</td>
<td>Environmental Chemical Analysis</td>
<td>3</td>
<td>CHEM 230 and CHEM 222 with a grade of C- or higher. A study of the sources, reactions, transport, effects, and fates of chemical species in the environment. Lecture and lab will stress the theory, methodology, techniques, and instrumentatiion for air, water and soil analysis for contaminants. 2 hours lecture, 2 hours lab.</td>
</tr>
<tr>
<td>CHEM 325</td>
<td>Atmospheric Chemistry</td>
<td>3</td>
<td>CHEM 230 and CHEM 232 with a grade of C- or higher. Atmospheric chemistry of the major pollutants of concern in today's environment, the emission sources, air/water and air/soil partitioning and exchange, atmospheric transport pathway, transformation processes (biological degradation, hydrolysis, photochemical transformations), deposition processes, pollutant chronic and acute health impacts, prevention and regulation. Course requirements: 2 field trips. 3 hours lecture.</td>
</tr>
<tr>
<td>CHEM 330</td>
<td>Green Chemistry</td>
<td>3</td>
<td>CHEM 231 with a grade of C- or higher. The focus of the course will be on the principles and applications of Green Chemistry, and its potential role in the minimization or elimination of negative impacts on the environment by the chemical industry, and the establishment of safe chemical practices. Topics such as, catalysis, development of more environmentally friendly and sustainable chemical processes and industrial case studies will be discussed. 3 hours lecture.</td>
</tr>
<tr>
<td>CHEM 340</td>
<td>Physical Chemistry I</td>
<td>3</td>
<td>CHEM 231 and PHYS 192 and MATH 221 with a grade of C- or higher. Thermodynamics, homogeneous and heterogeneous equilibria, gases, electrochemistry, solutions, colligative properties. 3 hours lecture.</td>
</tr>
<tr>
<td>CHEM 341</td>
<td>Physical Chemistry II</td>
<td>3</td>
<td>CHEM 340 with a grade of C- or higher. Kinetics, photochemistry, molecular physical chemistry. 3 hours lecture.</td>
</tr>
<tr>
<td>CHEM 343</td>
<td>Experimental Physical Chemistry</td>
<td>2</td>
<td>CHEM 340 with a grade of C- or higher. Corequisite(s): CHEM 341. A laboratory course to be taken concurrently with CHEM 341. Application and experience with experimental techniques of physical chemistry. Students will perform experiments in calorimetry, measurement of thermodynamic variables, electro-chemical phenomena and kinetics. Analysis of experimental data, statistics and applications of microcomputers will be included. Meets the Graduation Writing Requirement for majors in Chemistry. 4 hours lab.</td>
</tr>
<tr>
<td>CHEM 347</td>
<td>Biophysical Chemistry</td>
<td>3</td>
<td>CHEM 370 with a grade of C- or higher and CHEM 340 with a grade of C- or higher. Thermodynamics, equilibria, transport processes, kinetics, and electrochemistry as applied to biomolecules and cellular processes. Previous course CHEM 447 effective through Spring 2011. 3 hours lecture. 4 hours lab.</td>
</tr>
<tr>
<td>CHEM 370</td>
<td>Biochemistry I</td>
<td>3</td>
<td>CHEM 231 with a grade of C- or higher. Organization of the living cell; structure, function and chemistry of proteins, carbohydrates and lipids; bioenergetics and oxidation. 3 hours lecture.</td>
</tr>
<tr>
<td>CHEM 371</td>
<td>Biochemistry II</td>
<td>3</td>
<td>CHEM 370 with a grade of C- or higher. The second semester of a two semester course in biochemistry. The course continues the coverage of the chemistry of proteins, carbohydrates, lipids, and nucleic acids, and their role in cellular function and processes. Topics such as the chemistry of hormones, recombinant DNA, mechanisms of enzyme action, protein synthesis, immunoglobulins and membranes are included. 3 hours lecture.</td>
</tr>
<tr>
<td>CHEM 372</td>
<td>Experimental Biochemistry I</td>
<td>2</td>
<td>CHEM 231 with a grade of C- or higher and CHEM 232 with a grade of C- or higher. CHEM 372 may be taken as a prerequisite (with a grade of C- or higher) or corequisite. A lecture and laboratory course of experimental methods in biochemistry. Biochemical applications of spectroscopy, chromatographic methods, enzyme kinetics, DNA and protein purification and electrophoretic techniques. 1 hour lecture, 3 hours lab.</td>
</tr>
<tr>
<td>CHEM 373</td>
<td>Experimental Biochemistry II</td>
<td>3</td>
<td>CHEM 370 with a grade of C- or higher and CHEM 372 with a grade of C- or higher. Corequisite(s): CHEM 371. A second-semester laboratory in modern techniques in experimental biochemistry to include important applications of major instrumentation. Primarily intended for Biochemistry majors. 6 hours lab.</td>
</tr>
<tr>
<td>CHEM 420</td>
<td>Advanced Inorganic Chemistry</td>
<td>3</td>
<td>CHEM 340 is a prerequisite or corequisite. Physical basis of bonding and reactivity of inorganic compounds. Electronic structure of atoms, ionic and covalent bonding, symmetry properties, chemistry and structure of transition metal compounds, organometallic chemistry, introduction to solid-state structures. 3 hours lecture.</td>
</tr>
<tr>
<td>CHEM 421</td>
<td>Experimental Inorganic Chemistry</td>
<td>3</td>
<td>CHEM 310. Corequisite(s): CHEM 420. Experience utilizing a broad selection of modern techniques for the synthesis, characterization and chemistry of inorganic compounds. Subjects covered will include catalysis, reaction mechanisms, and use in organic synthesis. 1 hour lecture, 4 hours lab.</td>
</tr>
</tbody>
</table>
CHEM 430 - Advanced Organic Chemistry 3 Credits
Prerequisite(s): CHEM 340 or 370. Consideration of structural and electronic theories which form the basis of organic chemistry. 3 hours lecture, 1 hour lecture, 4 hours lab.

CHEM 440 - Advanced Physical Chemistry 3 Credits
Prerequisite(s): MATH 420 and CHEM 341. Quantum mechanics, bonding theory, atomic structure, statistical thermodynamical calculations. 3 hours lecture, 1 hour lecture, 4 hours lab.

CHEM 490 - Selected Topics in Chemistry 2-3 Credits
Prerequisite(s): CHEM 340 or CHEM 370. In-depth study of a modern aspect of chemistry. May be repeated once for a maximum of 6.0 credits as long as the topic is different. 1 hour lecture, 4 hours lab.

CHEM 491 - Honors Seminar in Chemistry 2 Credits
Prerequisite(s): Admission to the honors program in chemistry or permission of the chemistry honors committee. Seminars and discussions on selected areas in chemistry under faculty guidance for students enrolled in the honors program in chemistry. 2 hours seminar. 1 hour lecture, 4 hours lab.

CHEM 492 - Honors Thesis in Chemistry 2 Credits
Prerequisite(s): CHEM 491. Preparation and oral presentation of a comprehensive written thesis in chemistry under guidance of a faculty mentor for completion of the honors program in chemistry. 2 hours lecture. 1 hour lecture, 4 hours lab.

CHEM 495 - The Chemical Literature 1 Credit
Prerequisite(s): CHEM 340 or CHEM 370 may be taken as prerequisite or corequisite. Introduction to web-based searching of the chemical and biochemical literature databases, including Scifinder Scholar, Science Citation Index, Science Direct, and ACS Search. Course requirements include a literature search paper and a brief seminar. Meets the Graduation Writing Requirement for majors in Chemistry. 3 hours lab.

CHEM 496 - Biochemistry Literature 1 Credit
Prerequisite(s): CHEM 370. Corequisite(s): CHEM 371. Introduction to searching the biochemistry literature including computerized searches and exploration of on-line journals and interesting internet sites. After becoming familiar with modern methods of information retrieval, students will conduct individual literature searches and do a group presentation. 2 hours lab.

CHEM 498 - Senior Laboratory 3 Credits
Prerequisite(s): CHEM 311, and CHEM 341, and CHEM 343. Multi-disciplinary laboratory study of the synthesis, separation, and characterization of chemical compounds. 1 hour lecture, 4 hours lab.

CHEM 499 - Undergraduate Research 1-3 Credits
Prerequisite(s): CHEM 233, Experimental Chemistry II, and departmental approval. Laboratory research on a specific problem in chemistry under guidance of a faculty mentor.

CHEM 501 - Teaching Chemistry in the Secondary School 3 Credits
Prerequisite(s): 16 semester hours in chemistry. Study of objectives, recent trends, methods of presentation, courses of study, lesson planning, instructional aids, and subject matter of high school chemistry. 3 hours lecture.
CHEM 536 - Nuclear Magnetic Resonance: Theory and Practice 3 Credits
Prerequisite(s): CHEM 310 (Analytical Chemistry) and CHEM 311 (Instrumental Analysis) or equivalents. A combination lecture/hands-on course utilizing the department's FT-NMR's to provide students with theoretical background and practical experience in modern 1-D and 2-D FT-NMR. 3 hours lecture.

CHEM 538 - Drug Design in Medicinal Chemistry 3 Credits
Prerequisite(s): Matriculation into the graduate program or permission of instructor. A comprehensive course covering the design and action of pharmaceutical agents. 3 hours lecture.

CHEM 540 - Advanced Physical Chemistry 3 Credits
Prerequisite(s): CHEM 341 (Physical Chemistry II) or instructor's permission. In-depth covering of thermodynamic concepts such as state functions and chemical equilibrium, calorimetry, molecular interactions, activities. Introduction to quantum chemistry. 3 hours lecture.

CHEM 542 - Quantum Chemistry and Spectroscopy 3 Credits
Prerequisite(s): CHEM 540 or departmental approval. Theoretical development of quantum mechanics as applied to chemistry. Application of theoretical procedure to atomic and molecular structure and bonding. Introduction to the theory of molecular spectroscopy. 3 hours lecture.

CHEM 544 - Chemical Thermodynamics and Electrochemistry 3 Credits
Prerequisite(s): CHEM 540 or departmental approval. In-depth study of classical thermodynamics. Development of thermodynamic functions describing chemical systems in equilibrium, with emphasis on systems of variable composition. Principles and application of electrochemistry, relationship of electrochemical principles to classical thermodynamics, and practical applications of electrochemistry. 3 hours lecture.

CHEM 546 - Chemical Spectroscopy 3 Credits
Prerequisite(s): CHEM 341 (Physical Chemistry II). Introduction to the theory of molecular spectroscopy. 3 hours lecture.

CHEM 548 - Chemical Kinetics 3 Credits
Prerequisite(s): CHEM 341 (Physical Chemistry II). Kinetics in its role of elucidating reaction mechanisms. Discussion of recent problems from the chemical literature including fast reactions and enzyme kinetics. 3 hours lecture.

CHEM 550 - Organometallic Chemistry 3 Credits
Prerequisite(s): CHEM 420 and CHEM 430 or equivalents. The course will introduce students to organometallic chemistry, mainly involving transition metals, but also including some main group metals. The material covered will focus on the unique chemistry of these compounds and their uses in organic synthesis, material science, and as catalysts. 3 hours lecture.

CHEM 556 - Advanced Analytical Chemistry 3 Credits
Prerequisite(s): CHEM 310 and CHEM 311 or departmental approval. This course builds on existing knowledge of analytical chemistry to develop a deeper understanding of how quality and quantity of data, propagation of errors, and instrumentation and laboratory protocols affect the uncertainty in measurements. This will be tied into the relevance and importance of validation of equipment and protocols and standard laboratory practices, which are discussed in light of requirements from regulatory agencies. 3 hours lecture.

CHEM 570 - Advanced Biochemistry 3 Credits
Prerequisite(s): CHEM 370 or instructor's permission. Structure, function, and chemistry of proteins, carbohydrates, nucleic acids, and lipids. Analytical methods biochemists use to study metabolism, regulation, binding, and catalytic activity of biomolecules. 3 hours lecture.

CHEM 574 - Protein Structure 3 Credits
Prerequisite(s): One semester of introductory Biochemistry or similar background. Primary, secondary and tertiary structure of proteins, protein structural motifs and protein structural families. Globular proteins, DNA binding proteins, membrane proteins, signal transduction systems, immune system protein structure, methods used for determination of protein structure. 3 hours lecture.

CHEM 575 - Enzyme Kinetics and Mechanisms 3 Credits
Prerequisite(s): CHEM 370 or equivalent. The following properties of enzymes are considered: structure, specificity, catalytic power, mechanism of action, multi-enzyme complexes, kinetics, regulation, and multi-enzyme systems. 3 hours lecture.

CHEM 576 - Lipid Biochemistry 3 Credits
Prerequisite(s): CHEM 370 or equivalent. Chemistry of plant and animal lipids, their occurrence, metabolism, and industrial uses. 3 hours lecture.

CHEM 577 - Nucleic Acid Biochemistry 3 Credits
Prerequisite(s): CHEM 370 or equivalent. This course will present fundamental aspects of nucleic acid biochemistry including structure and biological function and will be organized according to a systematic consideration of techniques used in the study of nucleic acids. Current literature and key topics such as protein-DNA, protein-drug complexes and nucleic acid repair mechanisms will be considered. 3 hours lecture.

CHEM 578 - Biochemistry Laboratory Techniques 3 Credits
Prerequisite(s): CHEM 370 or equivalent. Fundamental techniques used to isolate, characterize, and study nucleic acids, proteins, carbohydrates, and lipids. Theory and application of buffers, spectrophotometry, tissue fractionation, centrifugation, extraction, chromatographic separations, electrophoresis, radioactivity, enzyme purification and kinetics, enzymatic assays, NMR and MS structure determination. 2 hours lecture, 3 hours lab.

CHEM 579 - Biomolecular Assay Development 3 Credits
Prerequisite(s): CHEM 370 or instructor's permission. This course will provide the student with hands-on experience of state of the art techniques used for drug discovery research in the pharmaceutical industry. These techniques include assay development for high throughput screening and molecular docking methods for lead discovery. Using these techniques will allow the student to understand the drug discovery process, which includes a dialogue between crystallographers, medicinal chemists, biochemists, and biologists. 2 hours lecture, 3 hours lab.

CHEM 582 - Biochemical Pharmacology 3 Credits
Prerequisite(s): CHEM 370 and CHEM 371. How drugs interact with, and influence biochemical pathways relevant to disease in the whole organism. Topics covered in this course deal with a review of fundamental concepts in biochemistry relevant to drug discovery, the process of drug discovery and specific examples of drug interactions with biochemical pathways and how they impact human disease. 3 hours lecture.

CHEM 590 - Selected Topics-Advanced Chemistry 3 Credits
Prerequisite(s): CHEM 341 (Physical Chemistry II) or instructor's permission. An in-depth study of selected areas in either analytical, inorganic, organic or physical chemistry, with special emphasis upon recent developments in the field. May be repeated three times for a maximum of 12 credits as long as the topic is different each time. 3 hours lecture.
CHEM 595 - Graduate Research 1-3 Credits
Prerequisite(s): Completion of 12 semester hours in this graduate program; instructor's permission. Directed individual laboratory investigation under guidance of faculty advisor. May be elected once or twice, maximum credit allowed is 3 semester hours.

CHEM 598 - Graduate Literature Search 1 Credit
Prerequisite(s): Completion of 18 semester hours of 500-level courses in the graduate program. Development of and investigation of a topic from the current chemical literature. Selection and refinement of a topic. Collection and preparation of resources and materials and development of an outline in preparation of writing a literature report and giving a formal seminar on the literature search. This course cannot be taken by students electing the Research/Thesis option for their graduate program. This course may be repeated once for a maximum of 2 credits. 2 hours independent study.

CHEM 599 - Graduate Seminar 1 Credit
Prerequisite(s): CHEM 598. An individual, non-experimental investigation and a formal presentation of scientific literature. 1 hour lecture.

CHEM 698 - Master's Thesis 3 Credits
Prerequisite(s): Departmental approval. Independent research project done under faculty advisement. Students must follow the MSU Thesis Guidelines, which may be obtained from the Graduate School. Students should take CHEM 699 if they don't complete CHEM 698 within the semester.

CHEM 699 - Master's Thesis Extension 1 Credit
Prerequisite(s): CHEM 698. Continuation of Master's Thesis Project. Thesis Extension will be graded as IP (in Progress) until thesis is completed, at which time a grade of Pass or Fail will be given.
