COMMUNICATION SCIENCE & DISORDERS (CSND)

CSND 100 Fields of Communication Sciences and Disorders (3 credits)
An orientation to practices in the field, philosophies of rehabilitation, areas of scientific inquiry and the relationship with other disciplines and specialties.

CSND 101 Fundamentals of Speech: Communication Requirement (3 credits)
Understanding the process of oral communication and improving personal skills in speaking and listening. Developing clear, effective comprehension and expression of the spoken American-English language.

CSND 103 Fundamentals of Voice and Speech Production (3 credits)
Theory and practice of efficient voice production and accurate articulation. Students receive guidance in the improvement of their own speech skills.

CSND 200 Techniques in Clinical Observation and Reporting (3 credits)
Observing, describing and reporting the behavior of clients with speech, hearing and language problems; the intake interview and parent conferences.

CSND 201 Perspectives on Communication (3 credits)
An overview of a variety of symbol systems used in communication through the perspectives of several related disciplines. Emphasis is given to the significance of the thought-language relationship, to the concerns of semantics and pragmatics, and to cross-cultural issues.

CSND 207 Hearing Science (3 credits)
Prerequisite(s): CSND 100. This course is designed to provide students with a foundation in the acoustic concepts central to the professions of speech-language pathology and audiology. Specifically, information needed to understand the perception and production of speech and other sounds will be presented.

CSND 309 Voice and Articulation Disorders (3 credits)
Prerequisite(s): CSND 103. Voice and articulation problems of pre-school and school-age children. Strategies, techniques and materials for evaluation and remediation.

CSND 383 Introduction to Language Development (3 credits)
Prerequisite(s): CSND 207 or LNGN 210. An overview of speech and language development from infancy through early school age. The course will familiarize students with the typical sequence of acquisition for phonology, semantics, syntax, morphology, and pragmatics and with theories and processes underlying language development. Issues related to dialects and non-mainstream speech will be considered. Interacting with a preschool child to obtain a language sample is required.

CSND 386 Communication Disorders: A Special Education Perspective (3 credits)
Prerequisite(s): CSND 383 or permission of the instructor. Restriction(s): CSND major. An examination of the influences on special education practices. Historical, legal, developmental, and instructional forces are explored. Career options as well as issues and trends are addressed.

CSND 408 Phonetic Study of Speech Sounds (3 credits)
Prerequisite(s): CSND 383 and departmental approval. This course will examine the articulation and features of American English speech sounds, the influence of context on sound production, and suprasegmental aspects of speech (intonation and stress). Dialectal variants and variation secondary to disorder will be considered. The course introduces students to the International Phonetic Alphabet (IPA) and provides opportunities to practice transcription.

CSND 409 Anatomy and Physiology of Speech and Hearing Systems (3 credits)
Prerequisite(s): CSND 383. The anatomical and physiological bases of respiration, phonation, articulation and respiration. The anatomy and physiology of the auditory mechanism.

CSND 410 Neurophysiological Bases of Communication (3 credits)
Prerequisite(s): CSND 409 and departmental approval. Study of the anatomy and physiology of the nervous system as it relates to the development of hearing, vision, thought, memory and emotions, as well as the perception, processing and production of speech and language.

CSND 412 Clinical Process and Procedures in Speech-Language Pathology (3 credits)
Prerequisite(s): CSND 200 and CSND 309. An orientation to clinical practice. A model of the clinical process is presented which interfaces the interpersonal relationship with professional/technical competencies. Consideration is given to planning treatment programs, traditional and augmentative clinical approaches, therapeutic activities/materials, and clinical reporting.

CSND 461 Introductory Practicum in Communication Disorders (3 credits)
Prerequisite(s): Major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Supervised clinical practice with children and adults presenting a variety of communication disorders.

CSND 462 Intermediate Practicum in Communication Disorders (3 credits)
Restriction(s): Major in Communication Sciences and Disorders, Speech-Language Pathology concentration. To provide students with initial experiences in offering clinical services to communicatively handicapped clients in the on-campus communication disorders center.

CSND 465 Seminar in Black Language (3 credits)
Prerequisite(s): Course in phonetics and psycholinguistics. Survey of black language patterns and their relation to standard English in the black speech community. Application to the goals of the speech therapist in predominantly black schools. (Senior-Graduate).

CSND 468 Clinical Procedures in Audiology (3 credits)
Prerequisite(s): CSND 409. The measurement of hearing including pure tone tests, screening tests, interpretation of test results, problems of calibration, and medical and educational referral. Demonstrations and supervised practice testing.

CSND 472 Speech Science and Instrumentation (3 credits)
Prerequisite(s): CSND 408 and CSND 409. Basic acoustics respiration and voice production acoustic theory of vowel production; consonant acoustics and speech perception.

CSND 474 Seminar in Speech Language and Hearing (1 credit)
Corequisite(s): SASE 453. Restriction(s): Majors only. Part of professional semester. It provides an opportunity to discuss and share technical and interpersonal issues related to the delivery of speech, language and hearing services. It also provides an opportunity to develop strategies for seeking solutions to problems encountered. The course will be concurrent with student teaching.
CSND 500 Language Assessment (3 credits)
Prerequisite(s): CSND 383 or APLN 500 or equivalent. This course introduced students to language sample analyses that are used for identifying individuals with language impairments or for selecting goals for intervention. Students will learn how to elicit language samples from individuals with language impairments. Students will learn the transcription and coding conventions of a computer language analysis software program and how the program can assist in analyzing language samples from individuals with language impairments.

CSND 501 Language Development in Primary Grades (3 credits)
Language activities in the elementary school curriculum analyzed with emphasis on the development of techniques for enhancing oral language proficiency in the school age child.

CSND 502 Psychology of Oral Communication (3 credits)
Speech and language in the individual; problems of communication that lead to confusion of meaning and misunderstanding. Psychology of persons who are handicapped in speech, hearing and/or reading, including those with hysterical or psychogenic impairments. Contributions of learning theory and of psycholinguistics.

CSND 503 Language and Communication (3 credits)
Examines the influence of psychology, linguistics, and biology on the study of how adults use language and how children learn language. Topics include current theory and experimental research in psycholinguistics, the relation between language and thought, language disorders, development of communication abilities and dialect differences.

CSND 511 Language Disorders of Adults I (3 credits)
Prerequisite(s): CSND 410 or equivalent; and CSND 500 or equivalent. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. This course is devoted to an advanced study of adult aphasia and other communication disorders associated with neuropathologies of adulthood.

CSND 512 Diagnosis in Speech-Language Pathology (3 credits)
Prerequisite(s): CSND 408 or equivalent; and CSND 521. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Diagnostic procedures for children and adults with communication disorders. Opportunities provided for interviewing clients and family members, administering tests and other assessment procedures, implementing data analyses, and report writing.

CSND 513 Parent Counseling in Communication Disorders (3 credits)
Restriction(s): Major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Parent-child-clinician triad analyzed with emphasis on parent counseling regarding home management of the child, interpretation of diagnostic and therapy findings and referral.

CSND 514 Communication Disorders of Aged (2 credits)
Restriction(s): Major in Communication Science and Disorders, Speech-Language Pathology concentration. Communication disorders associated with pathologies that tend to occur in later life, e.g., aphasia, multiple sclerosis, Parkinsonism and cerebral arteriosclerosis.

CSND 515 Voice Disorders (3 credits)
Prerequisite(s): CSND 409 or equivalent; and CSND 534. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration; CSND 408 or equivalent. Selected disorders of voice production. Consideration given to etiology, pathology, and treatment of voice disorders in children and adults.

CSND 516 High Risk Infants - Early Intervention Practices (3 credits)
The rationale and methods for early intervention with high risk infants and their families are studied (birth to three). Examination of current research and study and observation of practices for early intervention in home, hospital, and community agency settings will be the major focus of the course.

CSND 517 Phonological and Articulation Disorders (3 credits)
Prerequisite(s): CSND 408 or equivalent. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. This course examines the nature of articulation and phonological disorders in children, emphasizing evaluation and treatment and including childhood apraxia of speech.

CSND 518 Language Disorders of Adults II (3 credits)
Prerequisite(s): CSND 511. In-depth study of assessment and treatment of aphasia and other acquired neurogenic communication disorders of adults.

CSND 519 Evaluation and Planning for Children with Speech and Language Disorders (3 credits)
Prerequisite(s): SPED 579. This course presents an overview of typical speech and language acquisition and of the speech, language and communication characteristics of children with primary and secondary speech and language disorders. A major focus will be on selecting, modifying, administering, and interpreting educational testing for these children. The course will also consider consultation and collaboration with speech-language pathologist, accommodations, and special issues in educational planning.

CSND 520 Audiology for Speech-Language Pathology (3 credits)
Prerequisite(s): CSND 468 or departmental approval. This course is designed to provide students with an overview of issues related to audiologic (re)habilitation and management across the lifespan. Information concerning amplification and other assistive listening devices, the impact of hearing loss, management of children with hearing loss in the schools and issues and approaches to rehabilitation in adults with hearing loss will be discussed.

CSND 521 Clinical Process and Procedures in Speech-Language Pathology (3 credits)
Corequisite(s): CSND 500 and CSND 517. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. The course provides an orientation to clinical practice in speech-language pathology. The clinical process is presented as a construct which interfaces interpersonal dynamics with preferred professional practices. A decision-making continuum is applied to the interpretation of client needs as a basis for developing goals, planning treatment procedures, documenting treatment and planning for referral and/or discharge.

CSND 522 Advanced Phonetics (3 credits)
Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Skill in use of phonetics in recognizing and distinguishing acceptable English speech sounds, deviant speech sounds, regional variations in standards of American English and sounds in foreign languages. Stress, phrasing and intonation patterns used in speaking English, with some analysis of these elements in other languages.
CSND 523 Educational Audiology (3 credits)
Prerequisite(s): CSND 468 or CSND 544 or equivalent. Restriction(s): Graduate major in Communication Sciences and Disorders. This course provides a basis for understanding how hearing and hearing losses have an impact on language, academic, and psychosocial development. Audiometric screening/testing, tympanometry and central auditory processing evaluation will be presented in the context of educational planning.

CSND 524 Evaluation and Treatment of Swallowing Disorders (3 credits)
Prerequisite(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. This course is designed to provide students with the information and skills necessary to evaluate and treat swallowing disorders in pediatric and adult populations within the scope of practice for speech-language pathologists. An interdisciplinary approach to clinical management is stressed. Students are given the opportunity to learn through classroom and laboratory experiences. Off-campus observations are required.

CSND 525 Motor Speech Disorders (3 credits)
Prerequisite(s): CSND 410 or equivalent, and CSND 534 or equivalent. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Neurological disorders of speech. Consideration given to etiology and differential diagnosis of the dysarthrias in adults and children, acquired apraxia of speech, and other motor speech disorders. Principles and techniques for treating motor speech disorders.

CSND 530 Clinical Observation/Clinical Preparation (1 credit)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Observation and preparation for clinical practice in audiology.

CSND 531 Clinical Audiology (3 credits)
Restriction(s): Graduate major in Communication Sciences and Disorders, Speech Language Pathology concentration. Increases skills in administering tests for pure-tone and speech perception thresholds; evaluation and interpretation of test results and analysis of client histories. Hearing aid evaluation, measurement of recruitment and tests for psychogenic deafness and malingering; pre- and post- surgical audiometry and special problems of differential diagnosis in testing children.

CSND 532 Clinical Practicum I (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Supervised clinical practicum.

CSND 533 Supervision of Speech and Hearing Programs (3 credits)
Develops skill in supervision of beginning clinicians by experienced therapists; criteria for evaluation, writing critiques and understanding interpersonal relationships that enhance teaching through criticism.

CSND 534 Speech and Hearing Science (3 credits)
Prerequisite(s): CSND 409 or equivalent. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Study of basic acoustics, memory, and perception. Advanced study of anatomy and physiology of the speech and hearing mechanisms. Commonly used instrumentation will be discussed.

CSND 535 Beginning Practicum in Communication Disorders (3 credits)
Prerequisite(s): CSND 521 or equivalent. This laboratory course provides observation hours and involves students in an initial experience under supervision in providing services to individuals with communication disorders at the MSU Communication Disorders Center. The course may be repeated once for a maximum of 6 credits.

CSND 536 Seminar in Audiology (6 credits)
Prerequisite(s): Departmental approval. Significant issues in audiology and opportunities for observation and participation in advanced clinical procedures. Minimum of 150 clock hours of practicum experience on- and off- campus required.

CSND 537 Hearing Aids and Hearing Aid Selection (3 credits)
Prerequisite(s): Departmental approval. Principles and procedures involved in fitting hearing aids and differential selection based on audiometric findings. Characteristics of hearing aids and ear molds.

CSND 538 Differential Audiometry (3 credits)
Prerequisite(s): Departmental approval. Sophisticated and advanced audiometric tests used in differential diagnosis of hearing problems. Demonstration and analysis of functional hearing loss tests, evoked response audiometry, difference limen tests, G.S.R. audiometry and tests for central auditory problems.

CSND 539 Environmental Noise Hazards and Controls (3 credits)
The essential aspects of the acoustic properties of sound and of the anatomy and physiology of the human auditory system will be presented. The specific properties of noise and noise generators will also be presented. The effects of noise on physiology and on various aspects of behavior will be discussed. Stress will be placed on current methods of noise control and hearing conservation.

CSND 540 Practicum in Audiology (1-3 credits)
Prerequisite(s): Departmental approval. Directed and supervised experience in advanced audiometric tests for differential diagnosis of hearing impairment.

CSND 541 Advanced Practicum in Audiology (3 credits)
Prerequisite(s): Departmental approval. Directed and supervised experience in advanced audiometric tests for differential diagnosis of hearing impairment.

CSND 542 Identification Audiometry and Conservation Programs (3 credits)
Approaches to identification of hearing problems in school children and hearing conservation programs. Industrial audiology; noise pollution, damage risk criteria and employment-connected hearing disability.

CSND 544 Diagnostic Procedures in Audiology I (3 credits)
Corequisite(s): CSND 547. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Principles and procedures for the basic audiological evaluation including pure-tone air and bone conduction and speech audiometry, clinical masking and acoustic immittance.

CSND 545 Diagnostic Procedures in Audiology II (3 credits)
Corequisite(s): CSND 548. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Principles and procedures for advanced audiological assessment focusing on the auditory brainstem response. The middle latency potentials, late potentials and electrocochleography are also covered.
CSND 546 Diagnostic Procedures in Audiology III (3 credits)
Corequisite(s): CSND 549. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Principles and procedures for vestibular assessment focusing on electronystagmography and videonystagmography. Course also covers vestibular anatomy and rehabilitation techniques.

CSND 547 Clinical Laboratory for Diagnostic I (1 credit)
Corequisite(s): CSND 544. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Applied clinical laboratory for Diagnostic I.

CSND 548 Clinical Laboratory for Diagnostic II (1 credit)
Corequisite(s): CSND 545. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Applied clinical laboratory for Diagnostic II.

CSND 549 Clinical Laboratory for Diagnostic III (1 credit)
Corequisite(s): CSND 546. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Applied clinical laboratory for Diagnostic III.

CSND 550 Basic Hearing Aid Technology and Fitting (3 credits)
Corequisite(s): CSND 551. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Basic understanding of the parts of a hearing aid and the role of those parts in the function of amplification systems. Topics include history and care of hearing aids as well as hearing aid selection procedures.

CSND 551 Clinical Laboratory Basic Hearing Aid Technology and Fitting (1 credit)
Corequisite(s): CSND 550. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Applied clinical laboratory for basic hearing aid technology and fitting.

CSND 552 Clinical Internship I (3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 553 Clinical Internship II (3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 554 Clinical Internship III (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Supervised clinical practicum.

CSND 555 Augmentative and Alternative Communication (AAC) Across the Lifespan (2 credits)
Prerequisite(s): CSND 521. This course will cover communication strategies, techniques, and low-and high-technology systems for people with severe developmental and acquired communication disorders who are unable to meet their daily communication needs through speech. Assessment, intervention, caregiver involvement, and working as part of a multidisciplinary team will be addressed.

CSND 556 Augmentative and Alternative Communication (AAC) Across the Lifespan (2 credits)
Prerequisite(s): CSND 521. This course will cover communication strategies, techniques, and low-and high-technology systems for people with severe developmental and acquired communication disorders who are unable to meet their daily communication needs through speech. Assessment, intervention, caregiver involvement, and working as part of a multidisciplinary team will be addressed.

CSND 557 Evaluation and Treatment of Autism (2 credits)
Prerequisite(s): CSND 583. This course is designed to prepare students to assess and provide evidence-based intervention to individuals with autism spectrum disorder (ASD) from early intervention through adolescence. The course will also cover etiology, characteristics of children with autism, and family involvement.

CSND 559 Pediatric Feeding (2 credits)
Prerequisite(s): CSND 521 or CSND 410 or equivalent. The study of pediatric feeding and swallowing disorders (neonates through late childhood). Assessment, diagnosis, intervention, caregiver involvement, and working as part of a multidisciplinary team will be addressed.

CSND 560 Childhood Apraxia of Speech (2 credits)
Prerequisite(s): CSND 517. This course covers current research topics in the assessment and treatment of childhood apraxia of speech. The course includes application of diagnostic procedures, defining characteristics unique to childhood apraxia of speech, and evidence-based intervention principles for treatment.

CSND 561 Clinical Practicum in Teaching the Deaf (3 credits)
Observing and teaching in a school or program for the deaf. Required of students who have little or no previous experience. Total of 125 hours must be completed with no more than 35 hours credited for previous experience elsewhere.

CSND 562 Intermediate Practicum in Communication Disorders (3 credits)
Prerequisite(s): CSND 535 with a grade of B- or higher. In this laboratory course, students provide services under supervision to individuals with communication disorders at the MSU Communication Disorders Center. The course may be repeated once for a maximum of 6 credits.

CSND 563 Clinical Practicum II (3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 564 Parent Implemented Language Therapy (2 credits)
Prerequisite(s): CSND 583. This course is designed to prepare students to provide evidence-based parent training to facilitate child language.

CSND 569 Teaching Total Communication to the Deaf Part I (3 credits)
This course is the first part of a 6 s.h. sequence. It is designed to provide students with a general orientation to all aspects of communication as it relates to deafness. The role of total communication within the educational setting will be explored in depth and students will develop basic skill in manual communication.

CSND 570 Teaching Total Communication to Hard of Hearing and Deaf II (3 credits)
Prerequisite(s): CSND 569. Methods and materials of teaching speech to children with severe hearing impairment. Techniques involving auditory training with amplification and group hearing aids included.

CSND 571 Methods of Teaching the Deaf and Hearing Impaired (3 credits)
Pre-school to the adult level with emphasis on language development and compensatory learning.

CSND 572 Speech Science and Instrumentation (3 credits)
Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Analysis of speech production and reception through use of equipment designed to measure selected features of the communication process.
CSND 573 Organization and Administration of Speech and Language Programs in Schools (2 credits)
Prerequisite(s): CSND 587. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. This course is designed to provide students with an overview of clinical programs in the public schools. Testing, scheduling, grouping, service delivery models, intervention and record keeping will be discussed within the perspective of clinical application. The role of the speech language pathologist in relation to administrators, teacher specialists in related areas, parents and paraprofessionals will be reviewed. Hands-on experience will also be part of the course.

CSND 574 Psychology of Deafness (3 credits)
Effects of deafness and hearing loss on the intellectual, social and emotional development of the child; congenital and acquired hearing loss and the behavior of hearing members of the client's world.

CSND 575 Language Development for the Deaf (3 credits)
Communication problems of the deaf with emphasis on application of psycholinguistic theory to development of language skills.

CSND 576 Aural Rehabilitation Across the Lifespan (3 credits)
Prerequisite(s): CSND 468, CSND 544 or equivalent. Restriction(s): Graduate major in Communication Sciences and disorders. Study of theory and techniques for developing speech reading and auditory training programs for individuals with hearing loss. Also considered will be basics of American Sign Language and social and vocational concerns.

CSND 577 Scientific and Professional Writing (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Provides an in-depth analysis of the organization and composition of articles, analyses and reviews according to formats prescribed by the academic, legal and other professions. Approaches to the writing of technical, research and clinical reports which contribute to and document the evolution and expansion of the scientific and professional body of knowledge in the health sciences are highlighted.

CSND 578 Seminar in Research in the Hard of Hearing and Deaf (3 credits)
Significant problems in the field of deafness and hearing impairment; evaluation of published research projects; critical analysis and experimental design.

CSND 580 Aural Rehabilitation for Adults (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Advanced study of the effects of hearing loss on communication, assessment and intervention strategies, assistive devices and counseling for adults.

CSND 581 Pediatric Aural (Re)Habilitation and Educational Audiology (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Advanced study of the effects of hearing loss on communication, educational development, assessment and intervention strategies, and counseling for children with hearing loss and their families.

CSND 583 Language Disorders of Children (3 credits)
Prerequisite(s): CSND 500. Restriction(s): Graduate major in Communication Sciences and Disorders or departmental approval. This course takes a predominately descriptive and non-categorical perspective to assessment and treatment of language disorders in children in the pre-linguistic through developing language stages. Syndromes and causal factors associated with language disorder will also be considered.

CSND 584 Cleft Palate and Craniofacial Disorders (2-3 credits)
Prerequisite(s): CSND 409 or equivalent; and CSND 517; and CSND 583. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Etiology, characteristics, and management of individuals with cleft lip, cleft palate and other craniofacial disorders. Unit on myofunctional therapy included.

CSND 585 Fluency Disorders (2-3 credits)
Prerequisite(s): CSND 534 or equivalent. Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Principles and methods of treatment for children and adults with fluency disorders. Methods of evaluation, specific techniques of treatment, and principles coordinating treatment with home and school life. Demonstrations with children and adults with fluency disorders serve as the basis for study and discussion.

CSND 587 Language Disorders in School Age Children (3 credits)
Prerequisite(s): CSND 583 may be taken as prerequisite or corequisite. The class considers the acquisition of language and its impairments in school aged children and the impact of language impairment on literacy, academic performance, and social interaction. Assessment and treatment approaches are discussed within an evidence-based practice perspective.

CSND 592 Research in Speech-Language Pathology (3 credits)
Restriction(s): Graduate major in Communication Sciences and Disorders, Speech-Language Pathology concentration. Significant problems in the field are investigated and published research projects evaluated. Critical analysis and experimental design are emphasized.

CSND 593 Seminar in Research Audiology (3 credits)
Prerequisite(s): Departmental approval. Significant problems in the field of audiology, evaluation of published research projects, critical analysis, and experimental design are emphasized.

CSND 594 Independent Study (1-3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Students select an area of Communication Sciences and Disorders and, with advisement, study the literature in the field, observe related programs at special schools and centers and write reports on findings. Regular conferences with instructor for guidance and evaluation. May be repeated twice for a maximum of 3 credits.

CSND 595 Applying Research to Clinical Practice in Speech-Language Pathology I (1 credit)
Prerequisite(s): CSND 592; and CSND 562 or CSND 599 may be taken as prerequisite or corequisite. Research on an approved topic in Speech-Language Pathology. In this course, students research a topic and write a paper about clinical management for a particular type of communication disorder. Students are assigned to a faculty mentor who will approve their topic and review the paper. The course may be repeated one time for a maximum of 2 credits.
CSND 596 Applying Research to Clinical Practice in Speech-Language Pathology II (1 credit)
Prerequisite(s): CSND 595 with a grade of B- or higher. Research on an approved topic in Speech-Language Pathology. For this course, students will complete the final version of a paper begun CSND 595 and participate in an oral presentation. Students who have not completed or received approval for the paper or who have not passed the oral must repeat the course. The course can be repeated once for a maximum of 2 credits.

CSND 598 Special Topics in Communication Sciences and Disorders (1-3 credits)
Prerequisite(s): Graduate Major in Communication Sciences and Disorders, Speech Language Pathology concentration. This seminar is designed to introduce newly emerging topics in communicative disorders.

CSND 599 Advanced Practicum in Speech-Language Pathology (3 credits)
Prerequisite(s): CSND 562 with a grade of B or higher. In this laboratory course, students provide services under supervision to individuals with communication disorders at the MSU Communication Disorders Center. The course may be repeated once for a maximum of 6 credits.

CSND 600 Externship in Speech-Language Pathology (4.5 credits)
Prerequisite(s): A grade of ‘B’ or better in CSND 599. This course is designed to provide the experiences and skills necessary for professional practice as a speech-language pathologist in hospitals, rehabilitation centers, nursing homes, and other clinical settings that provide services to individuals with communication disorders. This course may be repeated.

CSND 601 Auditory Processing Disorders (3 credits)
Prerequisite(s): CSND 468 or CSND 544 or equivalent. Restriction(s): Graduate major in Communication Sciences and Disorders. The study of auditory processing disorders in school-age children and adults. The course will include the impact of such disorders on receptive language, expressive language, reading, academic achievement, attending behaviors and organizational skills.

CSND 602 Hearing and Speech Science (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Advanced study of the foundations of acoustics and mechanisms for the production and perception of speech.

CSND 603 School Externship in Speech-Language Pathology (4.5 credits)
Prerequisite(s): Grade of B or better in CSND 599. This course is designed to provide the experiences and skills necessary for professional practice as a speech-language pathologist within a school setting. This is a full-time externship experience under the supervision of an ASHA certified speech-language pathology supervisor who holds New Jersey certification to practice in a school setting.

CSND 620 Pediatric Audiology (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Study of assessment and intervention techniques for infants and young children with hearing loss.

CSND 621 Implantable Devices for the Remediation of Hearing Loss (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Clinical and theoretical information regarding implantable devices for the remediation of hearing loss.

CSND 622 Otoacoustic Emissions (2 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Principles and procedures for advanced auditory evaluation using otoacoustic emissions. Spontaneous, transient-evoked and distortion-product emissions will be covered.

CSND 663 Clinical Practicum III (3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised Clinical Practicum.

CSND 671 Special Topics in Audiology (1 credit)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Contemporary topics in the field of audiology: national certification and state licensure requirements, changing healthcare practices and the provision of audiology services, presentation of faculty and student research, clinical case presentations, among others. Students may repeat this course up to four times as long as the topic of the seminar is not the same. Course may be taken three times for a maximum of 9 credits.

CSND 676 Issues in Healthcare Systems (2 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. An analysis of selected professional and policy issues affecting the present and projected healthcare delivery system. Issues concerning healthcare personnel, patients, healthcare technology, organizational structures and facilities, finance mechanisms and the role of government are stressed in relation to how they influence healthcare services and delivery.

CSND 699 Clinical Externship I (2 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 700 Clinical Externship II (2 credits)
Prerequisite(s): Permission of Graduate Advisor required. Intensive supervised off-campus clinical practicum.

CSND 701 Auditory Anatomy and Physiology (3 credits)
Prerequisite(s): CSND 410 as prerequisite or corequisite. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Gross and fine anatomy and physiology of the mammalian peripheral and central auditory system.

CSND 702 Clinical Instrumentation (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Principles and use of clinical instrumentation in speech-language pathology and audiology. Laboratory exercises of a clinical emphasis are provided to illustrate course content.

CSND 703 Biomedical Ethics (2 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. A study of the application of human and professional values, judgment and choices to selected ethical dilemmas that arise in health care practice.
CSND 704 Clinical Laboratory in Auditory Processing Disorders (1 credit)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Principles and procedures for advanced auditory evaluation of central auditory processing disorders. Underlying mechanisms, assessment and treatment will be addressed.

CSND 705 Community and Industrial Audiology (2 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Measurement of noise and its impact on hearing and communication. The impact of noise in industrial, school and military settings will be addressed.

CSND 706 Advanced Amplification Technology (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. CSND 550 and CSND 551 or permission of instructor. Advanced study of amplification systems including programmable hearing aids, digital hearing aids. Study of personal and classroom FM systems. Tactile device technology used to manage the communication needs of individuals with profound hearing loss will also be addressed.

CSND 707 Genetics and Embryology of the Auditory System (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. The role of genetics and embryology on auditory function as they apply to the understanding of diseases and disorders of the ear. Attention will be paid to the Human Genome Project as it has provided a wealth of information that is critical to clinical practice. The essentials of infection control and common medical terminology as they relate to audiologic practice will also be addressed.

CSND 708 Psychoacoustics I (3 credits)
Corequisite(s): CSND 709. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Study of psychophysical methods and perception of the parameters of sound in humans and animals with normally functioning auditory mechanisms.

CSND 709 Laboratory for Psychoacoustics I (1 credit)
Corequisite(s): CSND 708. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. This course serves as a corequisite for CSND 708 and will allow those students in CSND 708 to apply concepts and make basic psychoacoustic measurements.

CSND 710 Neurophysiology for Hearing, Language and Speech (3 credits)
In this course students will learn about the neurophysiology specifically involved in communication and balance.

CSND 711 Counseling in Audiology (3 credits)
This course will discuss the techniques, content, and challenges in counseling persons with hearing loss and their families.

CSND 722 Advanced Auditory Potentials (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Overview of audiological applications of auditory event-related potentials, including the P1-N1-P2 complex, the mismatch negativity and P3.

CSND 731 Clinical Externship III (2 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 732 Clinical Externship IV (2 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 750 Research Methods (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Provides students with a working knowledge of the research process, including formulation of a research question, measurement and various statistical procedures of data analysis.

CSND 762 Clinical Practicum IV (3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 763 Clinical Practicum V (3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 801 Advanced Scientific and Professional Writing (3 credits)
Prerequisite(s): CSND 577 or permission of instructor. This course will cover scientific writing, including proposals for the dissertation and grants, manuscript reviews, and preparation of manuscripts, posters, and oral presentations. Practice and revision of individual work will be emphasized. There will be time for group feedback as well as individual mentoring.

CSND 804 Seminar in University Teaching (1 credit)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. This seminar will prepare students for the University Teaching practicum.

CSND 805 Mentoring (1 credit)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical supervision/clinical teaching experience in audiology.

CSND 806 Cognition and Hearing Science (3 credits)
Prerequisite(s): CSND 708 or permission of instructor. Advanced study of the effects of hearing loss and aging on the perception of simple and complex sounds.

CSND 807 Medical Audiology (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Prerequisite(s): CSND 707 or permission of instructor. Advanced study of the pathology of the auditory and vestibular system.

CSND 808 Psychoacoustics II (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. The study of perception of language from a psychological base. Emphasis will be placed on the impact of hearing loss on the perception of speech and spoken language.

CSND 809 Neurophysiology for Hearing, Language and Speech (3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical practicum.

CSND 810 Counseling in Audiology (3 credits)
This course will discuss the techniques, content, and challenges in counseling persons with hearing loss and their families.

CSND 811 Advanced Auditory Potentials (3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Overview of audiological applications of auditory event-related potentials, including the P1-N1-P2 complex, the mismatch negativity and P3.

CSND 834 Seminar in University Teaching (1 credit)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. This seminar will prepare students for the University Teaching practicum.

CSND 835 Practicum in University Teaching (2 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised teaching experience in audiology. May be repeated for a total of 4 credits.

CSND 836 Practicum in Clinical Preceptorship (2 credits)
Prerequisite(s): Permission of Graduate Advisor required. Supervised clinical supervision/clinical teaching experience in audiology.
CSND 837 Seminar in Clinical Preceptorship (1 credit)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. This course will prepare students for CSND 836, Practicum in Clinical Preceptorship.

CSND 840 Special Topics in Communication Sciences and Disorders Seminar (1-3 credits)
Restriction(s): Matriculation in PhD program in Communication Sciences and Disorders, Permission of Instructor. Advanced study and analysis of current research and/or clinical issues in communication sciences and disorders. May be repeated for a maximum of 12 credits.

CSND 841 Seminar in Motor Speech Disorders (1-3 credits)
Restriction(s): Matriculation in PhD program in Communication Sciences and Disorders; and Permission of instructor. Advanced study and analysis of current research and clinical issues in motor speech disorders.

CSND 850 Directed Research I (1-3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Development of the research question and review of the literature. Can be taken up to three times for 9 credits. Research project will be graded as IP (In Progress) until requirements are completed, at which time a grade will be given.

CSND 851 Directed Research II (1-3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Development of the study design, development of IRB application, and data collection. Can be taken up to three times for 9 credits. Research project will be graded as IP (In Progress) until requirements are completed, at which time a grade will be given.

CSND 852 Directed Research III (1-3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Data collection and development of the final document. Can be taken up to three times for 9 credits. Research project will be graded as IP (In Progress) until requirements are completed, at which time a grade will be given.

CSND 854 Applied Analysis for Communication Sciences and Disorders (3 credits)
Prerequisite(s): CSND 750. Students will learn to analyze data while they are actively engaged in research in their program of study. Descriptive and inferential analyses of research data, including but not limited to: significance testing and p-values, t-test, chi-square, ANOVAs, regression and correlation, use of statistical software, reading statistical results in the literature, and write up of statistical results.

CSND 862 Fourth Year Externship I (2-3 credits)
Corequisite(s): CSND 864. Prerequisite(s): Permission of Graduate Advisor required. Intensive supervised off-campus clinical residency.

CSND 863 Fourth Year Externship II (2-3 credits)
Prerequisite(s): Permission of Graduate Advisor required. Intensive supervised off-campus clinical residency.

CSND 864 Online Grand Rounds (1-6 credits)
Corequisite(s): CSND 862. Prerequisite(s): Permission of Graduate Advisor required. Fourth-year externship students discuss clinical cases with peers and faculty.

CSND 865 Speech-Language Pathology for Audiologists (1 credit)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. Complete overview of speech and language problems encountered by audiologists in clinical practice in order to make informed decisions regarding patient referral and follow-up. Equivalent course CSND 504 effective through Fall 2018.

CSND 899 Directed Readings (1-3 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders or permission of graduate advisor. A directed readings course is a tailored reading course negotiated between an instructor and a student to enable that student to explore in depth a particular topic or area of knowledge with the guidance of a faculty member. Directed readings courses shall not duplicate the content of regular courses. This may, of course, build on and extend exploration commenced in regular courses. May be repeated up to four times for a maximum of 12 credits.

CSND 900 Dissertation Advisement (3-12 credits)
Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders; Advancement to Candidacy. Permission of Graduate Advisor required. This department requires 12 credits of CSND 900. While enrolled in CSND 900, students will work with their Dissertation Chair and their Dissertation Committee. Credits are reported as IP (In Progress) while the dissertation is being written. At the conclusion of the dissertation defense, a final grade of Pass or Fail will be recorded.

CSND 901 Dissertation Extension (1 credit)
Prerequisite(s): 12 credits of Dissertation Advisement. Restriction(s): Matriculation in the AuD in Audiology or the PhD in Communication Sciences and Disorders. Permission of Graduate Advisor required. Once students have acquired 12 credits of CSND 900 Dissertation Advisement, they must enroll in 1 credit of CSND 901 in every semester in which they intend to work on the dissertation, up to and including the semester of the defense. Credits are reported as IP (In Progress) while the dissertation is being written. At the conclusion of the dissertation defense, a final grade of Pass or Fail will be recorded. CSND 901 may be repeated up to four times for a maximum of 12 credits.

CSND 920 Qualifying Examination Preparation (0.5 credits)
Restriction(s): Matriculation in PhD in Communication Sciences and Disorders. Permission of Graduate Advisor required. Once students have acquired 12 credits of CSND 900 Dissertation Advisement, they must enroll in 1 credit of CSND 920 in every semester in which they intend to work on the examination. Credits are reported as IP (In Progress) while the examination is being written. At the conclusion of the examination, a final grade of Pass or Fail will be recorded.
